

ReadMe.1st

**Notes:**

1. Date: Import declaration data retrieved between 2019-01-01 and 2019-12-31 inclusive.

2. Commodity:	HS Codes:	Quantity Reporting Requirements in Customs Tariff		Comments
	Meat of:			
	0208.10 rabbits or hares	KGM	kilograms	domestic rabbit only; report not included
	0208.30 primates	KGM		no report, indicates no imports
	0210.91 primates	KGM		no report, indicates no imports
	0208.40 marine mammals	KGM		no report, indicates no imports
	0210.92 marine mammals	KGM		no report, indicates no imports
	0208.50 reptiles	KGM		report included
	0210.93 reptiles	KGM		report included
	0208.60 Camelidae	KGM		camel meat from Australia only; camels are an introduced species in Australia and meat imports are from free-range livestock; thus report for camels not included
	0208.90 deer, frogs' legs, other than specified above	KGM		reports included
	0410.00 Edible products of animal origin, not elsewhere specified or included	KGM		report included
	Animal products other than edible:			
	0505.90.00.90 skins of birds	KGM		report included
	0507.10 ivory; ivory powder and waste	-		report included, dash indicates quantity reporting on accounting not required
	0507.90 other unworked or simply prepared animal products, tortoiseshell, whalebone, antlers, hooves, nails, claws, beaks	KGM		report included
	0510.00 glands and other animal products used in the preparation of pharmaceutical products	-		report included, dash indicates quantity reporting on accounting not required
	1504.30 fats and oils of marine mammals	KGM		report included
	4103.20 raw hides and skins of reptiles	NMB	numbers	report included
	4106.40 tanned hides and skins of reptiles	-		report included, dash indicates quantity reporting on accounting not required
	4113.30 leather further prepared after tanning, of reptiles	MTK	square meters	report included
	4301.10.00.20 raw furskins of wild mink	NMB		report included
	4301.60 raw furskins of fox	NMB		report included
	4301.80 raw furskins of various other species	NMB		reports included
	4302.11.00.20 tanned furskins of wild mink	NMB		report included
	6701.00 skins and other parts of birds	-		report included, dash indicates quantity reporting on accounting not required
	9601.10 worked ivory and articles of ivory	-		report included, dash indicates quantity reporting on accounting not required
	9705.00 zoological specimens (filtered from other specimens)	-		report included, dash indicates quantity reporting on accounting not required
3. Fields:	Scientific Name field shows taxonomic names declared by importers on electronic import declarations; left blank when no taxonomic names provided.			
	Product Description field shows general description of animal products, which may sometimes include common and scientific names as declared by importers on electronic import declarations.			
	Country of Origin and Place of Export: Country codes declared on import declarations (electronic and paper); for list of country codes and corresponding countries, see: Appendix H, List 2: <a href="https://www.cbsa-asfc.gc.ca/publications/dm-md/d17/d17-1-10-eng.html#a13">https://www.cbsa-asfc.gc.ca/publications/dm-md/d17/d17-1-10-eng.html#a13</a>			
	Animal Source: (captive reared, wild, etc.) unable to ascertain from import declarations; not reported			
	Purpose of Import: unable to ascertain from most import declarations; not reported			
4. General:	Scientific and common names for those species declared on paper import declarations are not accessible, hence the frequent 'unknowns' under the Product Description field.			
	The number of individuals imported as declared on paper import declarations are derived from electronic records based on Harmonized System (HS) codes and reported for each unique combination of country of origin/place of export.			
	In some cases for which quantity and product description data were highly variable, examples of product descriptions and species names are provided without quantities, e.g., 670100.
